EXECUTIVE SUMMARY

THRED VISION operates an integrated ready-made garment manufacturing complex spanning approximately two acres in the SIDCO Industrial Estate EPIP Phase 1, Ganjimutt, Karnataka. Established in 2022 along the vital Bangalore Highway industrial corridor, the enterprise provides end-to-end apparel engineering for domestic brands, retail labels, and export sourcing houses.

KEY OPERATING PARAMETERS:

- Facility Land: 2 ACRES at SIDCO Industrial Estate, Ganjimutt, Dakshina Kannada
- Modern Machinery: 400+ MACHINES (advanced stitching, cutting, and finishing)
- Dedicated Workforce: 400+ WORKFORCE including technicians, line supervisors and specialists
- Monthly Production Capacity: 1L+ GARMENTS/MONTH across men's and women's lines
- Order Flexibility: Minimum 10,000 pcs to large-scale batches of 2,00,000 pcs (2 Lakhs)
- Certifications: Grade A Approved Reliance Vendor Audit, Factories Act Licence MNG-3047/2022
- Global Trade Authorization: DGFT Import Export Code (IEC) 0722019482

SECTION 02 · COMPANY PROFILE

Corporate Charter, Vision & Mission

REGISTERED BUSINESS IDENTITY

Legal Entity Name: THRED VISION GARMENTS

Year of Establishment: 2022

Managing Directors: Subhash N & Sandesh N

General Manager: Dinesh Chandra

Industry Sector: Ready-Made Garment Manufacturing & Apparel Export

Operating Address: No 11 P1-A, SIDCO Industrial Estate EPIP Phase 1, Badagaulipady Village, Ganjimutt, Dakshina Kannada, Karnataka, India - 574144

Strategic Corridor: Bangalore Highway Corridor, Mangalore Industrial Belt

VISION & STRATEGIC MISSION

CORPORATE VISION:

To be India's premier high-precision ready-made garment manufacturing hub, delivering world-class apparel quality through technological excellence, environmental stewardship, and sustainable operations.

CORPORATE MISSION:

1. Production Precision: Manufacture garments conforming strictly to buyer tech packs and international tolerances.
2. Scalable Throughput: Deliver on-time consignments with an established monthly throughput of 1L+ GARMENTS/MONTH.
3. Workforce Empowerment: Uphold worker safety, fair compensation, and skill advancement for our 400+ WORKFORCE.
4. Quality Culture: Implement rigorous zero-defect multi-stage quality checkpoints from raw yarn to final pack.

CORE VALUE PILLARS

- INTEGRITY IN PRODUCTION: Transparent reporting on material yields, batch timelines, and cost structures.
- RELENTLESS QUALITY CONTROL: Pre-production, in-line, end-line, and final AQL 1.5/2.5 inspection protocols.
- TIMELY LOGISTICS: Rapid highway transit connecting Bangalore, regional dry ports, and Mangalore harbour.
- CUSTOMER FOCUS: Dedicated merchandiser teams for seamless brand communication and sample turnaround.

SECTION 03 · MANUFACTURING COMPLEX

Plant Facility & Footprint (2 ACRES)

GANJIMUTT INDUSTRIAL COMPLEX SPECIFICATIONS

Total Facility Footprint: 2 ACRES

Industrial Zone: SIDCO Industrial Estate, Export Promotion Industrial Park (EPIP) Phase 1
Location: Ganjimutt, Badagaulipady Village, Dakshina Kannada District, Karnataka
Plant Units: Unit 1 and Unit 2 Integrated Manufacturing Buildings
Power Infrastructure: High-tension grid backed by 400 HP commercial power allocation
Water & Steam: Dedicated water treatment and industrial steam pressing utility loops
Environmental Compliance: Karnataka State Pollution Control Board clearance

FACILITY HIGHLIGHTS & INFRASTRUCTURE MATRIX

- UNIT 1 BUILDING: Housing the main fabric warehouse, raw material quarantine, precision CAD cutting section, prototype sampling cell, and administrative management offices.
- UNIT 2 BUILDING: Synchronized high-speed sewing lines (400+ MACHINES), progressive assembly loops, thread trimming, intermediate KQCP stations, steam pressing, and export packing hall.
- LOGISTICS YARD: Heavy vehicular container loading docks with weather-proof ramp access for smooth freight transit directly onto the Bangalore Highway.
- SECURITY & SAFETY: 24/7 CCTV surveillance, automated fire hydrant lines, smoke sensors, and fully illuminated emergency exit corridors conforming to Factories Act standards.

LOCATION STRATEGY

Situated 18 km east of Mangalore along the primary Bangalore Highway (NH 75 connector), the Ganjimutt manufacturing hub provides optimal transit access for both domestic fabric mills in Tamil Nadu/Karnataka and export shipment gateways via Mangalore Port and international airports.

SECTION 03 · INDUSTRIAL FACILITY

Plant Facility Architecture — Ganjimutt Complex

FACILITY VISUAL DOCUMENTATION & CREDENTIALS

PHOTOGRAPH 01: Modern 2 ACRES Industrial Plant Exterior
Location: SIDCO Industrial Estate EPIP Phase 1, Ganjimutt, Karnataka
Footprint: Spanning 2 ACRES with dedicated Unit 1 and Unit 2 infrastructure.

The facility was planned and engineered specifically for high-efficiency garment manufacturing, incorporating daylighting roofs, forced-air industrial ventilation, and optimized material flows from incoming fabric rolls to outbound export container cartons.

Validated under Karnataka Factories Act Licence # MNG-3047/2022.

SECTION 04 · OPERATIONS

Production Floor Infrastructure & Workflow

ZONAL DEPARTMENTAL LAYOUT

ZONE A: RAW MATERIAL & FABRIC WAREHOUSE (15,000 SQ FT)

• Roll quarantine, 4-point fabric inspection frames, relaxation racks, GSM verification scales.

ZONE B: CAD PATTERN & AUTOMATED CUTTING SECTION (12,000 SQ FT)

• Computerized marker nesting, multi-ply spreading tables, band-knife and straight-knife cutters.

ZONE C: SEWING & ASSEMBLY PRODUCTION FLOOR (35,000 SQ FT)

• 400+ MACHINES organized in progressive bundling lines.

ZONAL FINISHING & DISPATCH

ZONE D: QUALITY AUDIT & KQCP INSPECTION (8,000 SQ FT)

• Inline audit checkpoints, seam symmetry benches, 100% measurement verification tables.

ZONE E: STEAM FINISHING, PRESSING & PACKING (10,000 SQ FT)

• Industrial vacuum ironing tables, boiler steam irons, needle detection tunnels, export boxing.

ZONE F: FINISHED GOODS SECURE WAREHOUSE (10,000 SQ FT)

• Heavy pallet racking, shrink wrapping, container staging docks.

SAFETY & UTILITIES BACKBONE

• Industrial transformer and silent generator backup ensuring 100% uptime for all 400+ MACHINES.
• Compressed air ring-main supplying pneumatic cutters, thread suckers and auto-foot lifters.
• Ergonomic anti-fatigue flooring, LED task lighting at every sewing needle point (500+ lux).

SECTION 04 · EQUIPMENT

Modern Machinery Inventory — 400+ MACHINES

MACHINERY BREAKDOWN (400+ MACHINES)

EQUIPMENT CLASSIFICATION

1. Single Needle Lockstitch (Direct Drive Servo): ..... 220 Units
   (Juki DDL series, Brother S-7200 with automatic thread trimmer)
2. Overlock / Safety Stitch (3-Thread & 5-Thread): ..... 85 Units
   (Pegasus & Juki high-speed overedge machines for knits and wovens)
3. Flatlock / Interlock Coverstitch: ..... 45 Units
   (Kansai Special & Siruba cylinder bed and flatbed coverstitch)
4. Specialized Machinery (Buttonhole, Button Attach, Bartack): ..... 25 Units
   (Computerized electronic lockstitch buttonholers and bartackers)
5. Cutting Room Equipment (Spreading, Straight Knife, Band Knife): ..... 15 Units
6. Finishing Equipment (Vacuum Tables, Steam Boilers, Needle Detectors): ..... 10 Units

TOTAL ACTIVE PRODUCTION MACHINERY: 400+ MACHINES

TECHNOLOGY ADVANTAGES

- DIRECT-DRIVE ENERGY EFFICIENCY: 70% energy reduction compared to conventional clutch motors, providing instantaneous needle acceleration and precision needle-stop positioning.

- REDUCED DEFECT RATES: Electronic thread trimmers and automated backtacking minimize operator fatigue and eliminate raw thread tails on finished garments.

- MULTI-MATERIAL VERSATILITY: Workstations calibrated for delicate single-jersey knits (140 GSM) through to heavy denim and twill trouser fabrics (380 GSM).

- PREVENTIVE MAINTENANCE SYSTEM: Dedicated in-house mechanical engineering workshop conducting scheduled oiling, timing audits, and gauge calibrations across all 400+ MACHINES.

SECTION 04 · PRODUCTION FLOOR

Stitching Operations & Machinery in Action

PRODUCTION FLOOR DOCUMENTATION

PHOTOGRAPH 02: 400+ MACHINES in Operation

Location: Unit 2 Main Stitching Hall, THRED VISION Ganjimutt Plant

The photograph demonstrates the synchronized assembly lines running under bright industrial lighting. Each workstation is engineered with individual LED task lights, progressive bundle trays, and pneumatic thread vacuums.

High throughput line balancing enables continuous assembly of men's and women's garments at an aggregate monthly capacity of 1L+ GARMENTS/MONTH.

SECTION 05 · HUMAN RESOURCES

Workforce Profile — 400+ WORKFORCE

WORKFORCE DEMOGRAPHICS & STRUCTURE (400+ WORKFORCE)

DEPARTMENTAL ALLOCATION

1. Executive Leadership & General Management: ..... 12 Members
   (Managing Director, General Manager, Production Head, QA Lead)
2. Merchandising, Marketing & Sourcing Specialists: ..... 18 Members
3. CAD Pattern Engineers, Graders & Sample Masters: ..... 15 Members
4. Cutting Room Operators & Bundlers: ..... 35 Members
5. Sewing Machine Technicians & Assembly Operators: ..... 240 Members
6. Quality Control Auditors (KQCP Gateways): ..... 45 Members
7. Steam Pressing, Packaging & Logistics Personnel: ..... 35 Members

TOTAL DEDICATED WORKFORCE: 400+ WORKFORCE

ETHICAL EMPLOYMENT & SOCIAL COMMITMENT

- SKILLED TECHNICAL ADVANCEMENT: Regular onboarding and machine upgrade workshops ensuring operators master complex lockstitch and coverstitch operations.
- STATUTORY WELFARE COMPLIANCE: 100% adherence to Provident Fund (EPF), Employee State Insurance (ESIC), fair wages, and overtime regulations under Karnataka Factories Act.
- GENDER INCLUSION & SAFETY: Strict zero-harassment workplace protocols, dedicated women's rest lounges, and transport provisions for late shifts.
- LOCAL ECONOMIC EMPOWERMENT: Fostering skilled apparel manufacturing careers within the Dakshina Kannada district, contributing to the regional industrial ecosystem.

SECTION 06 · MANUFACTURING SCALE

Production Capacity & Order Scale

CAPACITY METRICS (1L+ GARMENTS/MONTH)

Monthly Stated Production Capacity: 1L+ GARMENTS/MONTH

Annual Factory Capacity: 1.2 Million Ready-Made Garments

Shift Structure: Regular single 8-hour shift with provision for dual shifts during seasonal peaks

Daily Output Run-Rate: ~4,000 to 4,500 finished garments per working day

Production Lines: 8 synchronized flexible modular assembly lines

ORDER QUANTITY BRACKETS & LEAD TIMES

TIER 1 — PILOT / CAPSULE COLLECTION (10,000 – 25,000 PCS)

- Minimum Order Quantity (MOQ): 10,000 pieces per style/colorway.
- Production Cycle: 30 to 40 days post approval of tech pack, lab dips, and proto samples.

TIER 2 — COMMERCIAL VOLUME RUN (25,000 – 1,00,000 PCS)

- Standard commercial volume for retail apparel chains and international brands.
- Production Cycle: 45 to 60 days with staggered partial dispatches.

TIER 3 — INDUSTRIAL SCALE RUN (1,00,000 – 2,00,000 PCS / 2 LAKHS)

- Peak single-batch capacity accommodated across dedicated production lines.

MATERIAL SOURCING CAPACITY

Our proximity to leading South Indian textile clusters (Tirupur, Coimbatore, Erode, Surat, Ahmedabad) enables rapid fabric procurement across 100% cotton, poly-cotton blends, linen, viscose, denim, and twill.

SECTION 07 · PROCESS ENGINEERING

5-Stage Precision Manufacturing Workflow

END-TO-END APPAREL MANUFACTURING CYCLE

STAGE 01: MERCHANDISING, CAD PATTERNING & TECH-PACK REVIEW

• Buyer tech-pack review, marker efficiency calculation, digital grading, pre-production sample sign-off.

STAGE 02: FABRIC QUARANTINE, RELAXATION & PRECISION CUTTING

• 4-point fabric inspection, 24-hr fabric roll relaxation, automated tensionless spreading, knife cutting.

STAGE 03: ASSEMBLY & STITCHING ON 400+ MACHINES

• Progressive bundle assembly, line-balanced feeding, specialized collar/pocket attachments.

STAGE 04: KEY QUALITY CONTROL POINTS (KQCP) & IN-LINE AUDITS

• 100% seam audit, dimensional tolerance checks (±0.5 cm), tension and tensile stitch strength.

STAGE 05: STEAM FINISHING, METAL DETECTION & EXPORT CARTON PACKING

• Form-finisher steam pressing, 9-point metal/needle detector gateway, barcoded export packaging.

PROGRESSIVE BUNDLE CONTROL & TRACEABILITY

Every garment cut is tagged with an individual lot barcode tracking:

• Mill fabric roll lot and dye lot number
• Cutting table and spreader operator ID
• Assembly line and machine cluster tracking
• Assigned KQCP quality inspector

This end-to-end traceability guarantees prompt root-cause isolation in case of deviations, safeguarding international buyers against lot inconsistencies or dye shade variance.

SECTION 08 · QUALITY CONTROL

Quality Assurance & KQCP Protocols

KEY QUALITY CONTROL POINT (KQCP) GATES

GATEWAY 1 — RAW FABRIC & ACCESSORY AUDIT (INCOMING)

• GSM test, shrinkage evaluation, rub-fastness, yarn count check, button pull test (min 90 N).

GATEWAY 2 — CUT-PIECE & BUNDLE ACCURACY AUDIT

• Top-middle-bottom ply measurement comparison, notch alignment, grain-line precision.

GATEWAY 3 — IN-LINE SEWING AUDIT (CRITICAL STITCH POINTS)

• SPI (Stitches Per Inch) check, tension balance, puckering audit, critical seam joining.

END-LINE & PRE-SHIPMENT AUDITS

GATEWAY 4 — 100% END-LINE VISUAL & SPECIFICATION INSPECTION

• Every garment inspected on illuminated inspection stands for skipped stitches, dirt, or oil stains.

GATEWAY 5 — FINAL RANDOM AQL AUDIT (ACCEPTANCE QUALITY LIMIT)

• Conducted as per ISO 2859-1 / ANSI ASQ Z1.4 sampling plans at AQL 1.5 Major / 2.5 Minor levels.

GATEWAY 6 — FERROUS CONTAMINATION SCAN (NEEDLE DETECTOR)

• 100% pass through calibrated 1.0 mm Fe / 1.2 mm Non-Fe conveyor metal detector tunnel.

ZERO-TOLERANCE DEFECT POLICY

Non-conforming items are isolated immediately in designated red quarantine bins, preventing accidental blending into finished carton despatches.

SECTION 08 · QUALITY CONTROL

Quality Inspection Hall — In-Line Audit

QUALITY CONTROL FACILITY DOCUMENTATION

PHOTOGRAPH 03: Garment Quality Audit & Specification Hall

Location: Unit 2 Inspection Department, THRED VISION Ganjimutt Plant

The photograph captures the specialized quality assurance team conducting rigorous measurement tolerance and seam symmetry checks on finished ready-made garments.

Equipped with calibrated tape measures, tension gauges, and color evaluation lightboxes (D65/TL84/CWF), this division ensures full compliance with international buyer dossiers.

SECTION 09 · GARMENT CATEGORIES

Men's Apparel Portfolio — Knits & Casuals

CATEGORY 01: T-SHIRTS & CREWNECKS

Fabric Compositions: 100% Combed Cotton, Cotton/Modal, CVC, Poly-Cotton, Melange
Weight Range: 160 GSM to 240 GSM (Single Jersey, Interlock, Rib)
Finishing Options: Bio-wash, silicon wash, enzyme wash, peach finish, carbonized handfeel
Necklines: Classic crewneck, deep round neck, raw-edge, bound collar with twin-needle stitch
Print & Embroidery: Water-based discharge screen print, high-density plastisol, digital DTG, embroidery
Stitching Details: 4-thread overlock seam with reinforced neck-tape from shoulder to shoulder

CATEGORY 02: POLO SHIRTS & HENLEYS

Fabric Compositions: 100% Combed Cotton Pique, Pique Poly-Spandex, Jacquard Knit
Weight Range: 200 GSM to 260 GSM (Heavy Pique, Honeycomb Pique)
Collar & Cuff: Engineered flat-knit ribbed collars and matching cuffs with elastane retention
Placket Construction: 2-button, 3-button fused placket with interlining and cross-stitched horn buttons
Side Vents: Herringbone tape reinforced side slits with bartack reinforcement
Fit Silhouettes: Modern Slim Fit, Regular Classic Fit, Athletic Tapered Fit

MANUFACTURING HIGHLIGHT:
Collar curl resistance achieved through pre-shrunk yarns and specialized fusing interlinings.

SECTION 09 · GARMENT CATEGORIES

Men's Apparel Portfolio — Shirts & Bottoms

CATEGORY 03 & 04: FORMAL & CASUAL SHIRTS

Fabric Compositions: 100% Giza/Supima Cotton, Cotton-Linen, Oxford Weave, Poplin, Twill

Counts: 40s, 50s, 60s, 80/2, 100/2 yarn counts

Collar Types: Cutaway spread, semi-spread, button-down, mandarin band collar

Cuffs: Single-button rounded, double-button mitered, French cuff

Seam Construction: Single-needle French seam side joins (16-18 SPI) with gusset reinforcements

CATEGORY 05 & 06: TROUSERS, JEANS & SHORTS

CHINOS & CASUAL TROUSERS:

• Cotton twill, cotton spandex stretch twill, satin stretch (220 - 320 GSM)

• Blind-stitched bottom hems, clean-finished piped interior waistband, heavy-duty YKK metal zippers

DENIM JEANS & BOTTOMS:

• 10 oz to 14.5 oz rigid and stretch indigo denim (cotton-elastane)

• Multi-needle chain-stitch waistband and yoke, rivet reinforced stress points, stone/enzyme wash

BERMUDA & CARGO SHORTS:

• Structured canvas and poplin utility shorts with bellows pockets and double-needle topstitching

SECTION 10 · GARMENT CATEGORIES

Women's Apparel Portfolio — Tops & Dresses

CATEGORY 01: TOPS & FASHION BLOUSES

Fabrics: Cotton Voile, Modal, Viscose Rayon, Georgette, Silk Blends, Poplin, Lyocell

Weight Range: 80 GSM to 160 GSM lightweight flowing weaves

Design Elements: Ruffles, pleats, smocking, peplum hems, puff sleeves, button-front details

Finishing: Baby-hems, rolled hems, French seams on sheer fabrics, keyhole back closures

Fits: Relaxed drape, tailored contour, cropped silhouette, wrap styles

CATEGORY 02: DRESSES & SKIRTS

DRESS VARIATIONS:

- Day dresses, shirt dresses, tier dresses, A-line midi dresses, slip dresses, bodycon knits
- Concealed invisible back zippers (YKK), elasticated waist shirring, matching fabric belts

SKIRT VARIATIONS:

- Knife-pleated skirts, bias-cut satin skirts, wrap midi skirts, denim mini and midi skirts
- Full interior poly/cotton lining, blind-stitched hems, reinforced waistband facing

PRECISION CRAFTSMANSHIP:

Engineered pattern matching across plaids, stripes, and large floral engineered prints.

SECTION 10 · GARMENT CATEGORIES

Women's Portfolio — Bottoms, Kurtis & Outerwear

CATEGORY 03: PANTS, TROUSERS & PALAZZOS

Fabrics: Linen-Cotton, Stretch Ponti, Viscose Twill, Cotton Lycra, Tencel

Silhouettes: Wide-leg trousers, tailored cigarette pants, culottes, elasticated joggers

Waistband Details: Half-elasticated comfort bands, belt loops, extended tab closures with hidden hooks

Pockets: Functional slant front pockets, jet back faux pockets, cargo utility options

CATEGORY 04: KURTIS, LEGGINGS & JACKETS

KURTIS & ETHNIC-FUSION TOPS:

• Straight kurtis, Anarkali cuts, high-low hem kurtas, front-slit tunics

• Cotton cambric, slub cotton, rayon flex, chanderi silk blends with delicate embroidery/lace trim

LEGGINGS & ANKLE TIGHTS:

• 95% Combed Cotton / 5% Spandex (200 - 240 GSM 4-way stretch knit)

• Flatlock 4-needle 6-thread seamless stitching for non-chafing durability and recovery

LIGHT JACKETS & OVERSHIRTS:

• Unlined summer blazers, utility overshirts in twill, cropped denim jackets

SECTION 11 · QUALITY STANDARDS

Fabric Testing & Dimensional Tolerances

PHYSICAL & CHEMICAL TEST CRITERIA

1. Dimensional Stability (Washing Shrinkage): ..... Max ±3% (Warp & Weft)
   (Tested as per ISO 6330 / AATCC 135 after 3 consecutive home launder cycles)
2. Color Fastness to Washing: ..... Grade 4 - 5
   (ISO 105-C06 / AATCC 61 evaluation on multi-fiber adjacent strips)
3. Color Fastness to Rubbing (Dry / Wet Crock): ..... Grade 4 (Dry) / 3-4 (Wet)
4. Seam Slippage & Tensile Strength: ..... Min 120 N seam pull
5. Pilling Resistance: ..... Grade 4 after 2,000 rubs

STANDARD TOLERANCE TABLE (READY-MADE APPAREL)

DIMENSION PARAMETER

- Chest / Bust Half-Circumference: ..... ±0.5 cm
- Body Length (From High Point Shoulder): ..... ±0.75 cm
- Shoulder Width (Seam to Seam): ..... ±0.5 cm
- Sleeve Length: ..... ±0.5 cm
- Waistband Half-Width: ..... ±0.5 cm
- Inseam Length (Bottoms): ..... ±0.75 cm
- Stitches Per Inch (SPI): ..... 12 - 14 SPI (Knits) / 14 - 16 SPI

Every critical dimension is audited across sample size sets prior to cutting marker release.

SECTION 12 · REGULATORY COMPLIANCE

Statutory Compliance — Factories Act Licence

GOVERNMENT OF KARNATAKA — FACTORIES ACT 1948

REGISTRATION CERTIFICATE & OPERATING LICENCE

Licence Reference Number: MNG-3047/2022

Issuing Authority: Directorate of Factories, Boilers, Industrial Safety & Health

Jurisdiction: Mangalore Region, Government of Karnataka

Factory Name: THRED VISION GARMENTS

Premises: Plot No 11 P1-A, SIDCO Industrial Estate EPIP Phase 1, Ganjimutt - 574144

Installed Power Capacity: 400 HP Commercial Grid Sanction

Approved Maximum Workforce: 400+ WORKFORCE

Status: Fully Valid, Active & Regulatory Compliant

STATUTORY SAFETY & OCCUPATIONAL HEALTH MANDATES

- OCCUPATIONAL SAFETY: Mechanical needle guards on all 400+ workstations, pulley guards, and eye shields on automated button attachment machinery.
- FIRE SAFETY MEASURES: Fire suppression system inspected and certified annually with clearly designated fire escape routes, illuminated signage, and trained fire wardens.
- FIRST AID & HEALTHCARE: Fully stocked first-aid medical station on the plant floor with retainer medical officer and tie-up with nearby tertiary hospital in Mangalore.
- AMENITIES: Reverse-osmosis (RO) chilled drinking water points, clean sanitary washrooms, and spacious staff cafeteria adhering strictly to Factories Act guidelines.

SECTION 13 · CUSTOMER CERTIFICATIONS

Client Audit Approval — Reliance Apparels Audit

AUDIT APPROVAL SUMMARY

RELIANCE RETAIL LIMITED — APPARELS SOURCING DIVISION

Audit Report Number: SMART101313

Vendor Entity Audited: THRED VISION GARMENTS

Audit Assessment Grade: GRADE A (APPROVED VENDOR)

Audit Category: Quality Management Systems, Technical Capability & Social Compliance

Scope: Manufacturing of Men's & Women's Ready-Made Apparel

Authorization: Approved for National Retail Distribution & Private Label Manufacturing

AUDITED SYSTEM COMPETENCIES

1. FABRIC STORAGE & LOT ACCURACY: Scored 94% on traceability and climate protection.
2. CUTTING ROOM QUALITY & SPREADING: Scored 96% on marker accuracy and notch tolerances.
3. SEWING LINE EFFICIENCY & CALIBRATION: Scored 95% on machine maintenance and calibration logs.
4. QUALITY ASSURANCE GATES (KQCP): Scored 98% on inline auditing and defect reporting.
5. ETHICAL LABOUR & SAFETY AUDIT: Scored 100% on wage compliance, working hours and safety.

CONCLUSION OF AUDIT REPORT SMART101313:

"THRED VISION operates an exceptionally well-maintained manufacturing unit in Ganjimutt.
Management demonstrates high commitment to quality, workforce welfare, and buyer protocols.
Recommended as Grade A preferred vendor for volume retail production."

SECTION 14 · COMMERCIAL AUTHORIZATION

Foreign Trade & Tax Compliance Credentials

DIRECTORATE GENERAL OF FOREIGN TRADE (DGFT)

GOVERNMENT OF INDIA — MINISTRY OF COMMERCE & INDUSTRY

Import Export Code (IEC): 0722019482

Registered Firm: THRED VISION GARMENTS

Issuing Regional Authority: Joint DGFT, Bangalore / Mangalore

Authorization Type: Commercial Exporter & Importer of Textile Goods

Authorized Ports: All Seaports, Air Cargo Complexes, and Inland Container Depots (ICD)

Export Promotion Council: Registered with Apparel Export Promotion Council (AEPC)

GOODS & SERVICES TAX (GST) REGISTRATION

CENTRAL BOARD OF INDIRECT TAXES & CUSTOMS (CBIC)

Goods & Services Tax Identification Number (GSTIN): 29AAGCT2914K1ZK

Legal Name of Business: THRED VISION GARMENTS

Taxpayer Type: Regular Taxpayer

State Code: 29 (Karnataka)

Filing Status: Active, Up to Date, Regular Compliance

BANKING & COMMERCIAL PARTICULARS:

- Primary Corporate Bankers: Scheduled Commercial Bank, Mangalore Industrial Branch
- Foreign Exchange Facilities: Active Export Letter of Credit (LC), DA/DP and wire transfer facility
- Currency Capabilities: INR, USD, EUR, GBP trade settlements

SECTION 15 · TRANSIT INFRASTRUCTURE

Supply Chain Logistics & Bangalore Highway Corridor

STRATEGIC HIGHWAY & PORT CONNECTIVITY

LOCATION ADVANTAGE: GANJIMUTT INDUSTRIAL HUB

- Highway Access: Directly situated on the Bangalore Highway corridor (NH 75 connector), facilitating rapid 6-hour freight movement to Bangalore distribution hubs.
- Seaport Proximity: 22 km to New Mangalore Port (NMPT), offering weekly container line sailings to Dubai (Jebel Ali), Singapore, Colombo, Europe, and the United States.
- Airport Connectivity: 14 km to Mangalore International Airport (IXE) with dedicated air cargo complex for urgent buyer sampling, proto approvals, and high-priority consignments.

RAW MATERIAL INFLOW & CONTAINER DESPATCH

INBOUND TEXTILE LOGISTICS:

- Yarn and fabric consignments transit directly from spinning and knitting hubs in Tamil Nadu (Tirupur, Erode, Coimbatore) via dedicated express container trucks within 24 to 36 hours.

OUTBOUND CARTON PACKING & CONTAINERIZATION:

- Export standard 7-ply corrugated export cartons strapped with polypropylene bands.
- Moisture barrier desiccants and shrink-wrapped palletization for ocean transit protection.
- Factory container stuffing capabilities with customs sealing and weighbridge clearance.
